

# IntraPac Laminate Tubes

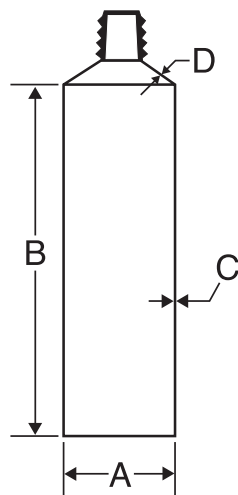

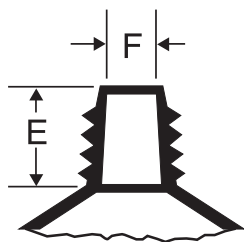

IntraPac laminate and plastic laminate tubes have multiple applications. For beauty aid products, these tubes are an excellent choice as they can be manufactured with short lead times and are suitable for many decoration possibilities. They are also an excellent package for pharmaceutical applications where the feel of plastic is desired and barrier material is required.

IntraPac's tubes will enhance your product's visibility and present new marketing opportunities for them.

## Tube Structure

Tubes have a nomenclature, like many products, all their own. When ordering a tube, refer to and know the following key parts.

- A. Outside Diameter
- B. Body Length
- C. Wall Thickness
- D. Shoulder Thickness
- E. Neck Length
- F. Neck Orifice Diameter

Keep in mind when requesting quotations, the following facts help us serve you better:

1. Product to be packaged
2. Diameter
3. Length
4. Neck Size and Type for opening
5. Cap Style and Color
6. Number of Print Colors with PMS Designations
7. Special Features, if any
8. Quantity
9. Delivery desired
